

Medicines Management

Your GP Practice supports a medicines management review service of medications prescribed to its patients. This service involves a review of prescribed medications to ensure patients receive the most appropriate, up to date and cost-effective treatments. This service is provided by qualified and registered healthcare professionals from within the GP practice, our NHS Primary Care Network, NHS Vale of York Clinical Commissioning Group or by external partners approved by the GP practice. Patient identifiable information does not leave the practice system but is accessed to ensure only appropriate clinical recommendations or decisions are made for each patient. Each patient can opt out of (or back into) the practice using their data for anything other than specified purposes or where there is a lawful requirement to do so.
